International Women's Day Celebration 2023

International Women's Day is globally celebrated annually on **March 8** as a focal point in the women's rights movement, bringing attention to issues such as gender equality, reproductive rights, and violence and abuse against women. International Women's Day is celebrated in many countries around the world. It is a day when women are recognized for their achievements without regard to divisions, whether national, ethnic, linguistic, cultural, economic or political. International Women's Day has assumed a new global dimension for women in developed and developing countries alike.

International Women's Day was jointly organized an expert talk on “**Guide to college women's health**” by Department of Mathematics and Department of Physics,

UTU on **13th March 2023**. **Dr. Heena Rathod, Assistant Professor of Shrimad Rajchandra College of Physiotherapy, UTU** was the expert of our session. Her expert talk emphasized to understand the major health issues linked to Nutrition Deficiency, Depression and suicide, Infertility and Breast Cancer. She mentioned “**The mind is very powerful and plays a big role in how you feel physically**” and also guided to pay attention to mental health for the upcoming generation.
