“Two Days Workshop on SPSS”

B.V. Patel Institute of Business Management, Computer and Information Technology organized two Days Work Shop on SPSS on 20th -21st January 2016 for final year students of BBA.

Data presentation is one of the most crucial steps in a dissertation and project work. An effective presentation of the data allows the researcher to not only analyze the data but it also helps the user of understand the data. In this context, there are a number of different measures adopted by the researcher for presenting the data. SPSS (Statistical Package for the Social Sciences) is one of the most preferred tools adopted by different researchers for data analysis in their research work.

Mr. Gunjan Shah - the resource person taught practically application of SPSS Software such in charts, cluster analysis, factor analysis, SPSS data entry, coding, One sample T test ,Two sample T test ,Correlation & Regression Analysis, and one-way ANOVA techniques, etc. to the enthusiastic students. Also students learnt ways to interpret data and infer conclusion accordingly. This workshop is beneficial to students required to undertake research project work as a part of academic requirement now as well as in future.
