

My experience about UTU-CHEM

My experience at Uka Tarsadia University was wonderful and was especially excellent in the chemistry department. I have completed my M.Sc in organic chemistry. UTU having an amazing infrastructure and library with sufficient books. Chemistry department has supportive faculty, lab and beautiful campus.

I have always found a positive and healthy environment and the faculties are highly supportive. The way they were interacting with students, way of teaching, making learning so interesting and explaining everything was outstanding. During the COVID-19, E-learning was effective and powerful tool. The best use of technology has been made by faculty through the useage of google classroom. Thanks to all teachers for their efforts.

Along with learning, co-curricular activity also take place and celebrate sports week and so many festivals. I have learnt a lot and made great progress. I am so thankful for every faculty member who pushed me to very best student.

Once again, I thanks to the institute and all the faculty members.
