

Kunj S. Talati

Int. M.Sc. Chemistry

(2016 – 2021)

Department of Chemistry now it's called as Tarsadia institute of Chemical Science (TICS). So, in this institute my journey was full of adventurous experience.

I have completed my Int. M.Sc. during 2016-2021. In these 5 years I learned so many precious things which I think that I may not learn these things in other university. It helps me to build up my confidence, soft skills, management and leadership quality. They give me chance to present poster present at the national or international conference and this department also held national conference so many times. So, with the help of this I met so many new people who had done there work in the research field. This institute gave me chance to take participate in extracurricular activity like uth festival which is university level and department also conducted different kind of academic and non academic activity. In this department they gave me chance for internship in IIT Gandhinagar at 2019 which helped me to broaden my understanding.

In this institute have the greatest faculty member. Dr. Paresh Patel the I/C Director of the department, he helped me a lot in this academic year. Dr. Bhavin Patel and Dr. Anand Patel for involving me for extracurricular activities. Dr. Dharmesh Chejara and Dr. Amrutlal Prajapat gave me chance to sports activities and thanks to the entire faculty member who believed in me and gave me the best knowledge, I would also like to thanks to lab assistance and the non teaching staff as well.

Yes, I miss the department so much, there class, laboratory, gallery of the department, days celebration, fun with the friends and faculties and I remember my fresher's party which was lot of fun. Faculties which were strict in class and partner in the off class. I wish I could take again admission in this department and enjoy the best moments again.
