

It has been great five years of experience at the Department of Chemistry, Uka Tarsadia Universty. I have completed my M.Sc. in Organic Chemistry with the achievement of Golg Medal during 2018-2020. UTU is a place where you can find an amalgamation of learning, fun, culture and many such life preaching activities.

My sincere appreciation and gratitude to all the faculty members of department for their efforts in imparting qualitative and technical knowledge. Institute has highly qualified faculties with good number of publications in reputed journals also they are very supportive and co-operative throughout all the semesters and dissertation work. Moreover institute has good laboratory facilities, advanced classrooms, canteen, huge library and transpotation facilities. With an M.Sc. degree students can pursue a PhD degree or increase their chances of career development in the basic sciences. Institute also provides wonderful placement opportunity to all eligible students.

I am thankful to every faculty member for all the extra efforts they make to help me grow and the challenges they encourage me to face to help me to become who I am. I am proud to call myself an alumnus of this department.
