

Divya Jagdishbhai Soni

M.Sc.[Organic Chemistry]

I , Divya soni, was a student of Organic chemistry in Department of Chemistry. I have completed my post graduation in 2014-15. I am thankful to my Parents and Department of Chemistry, Uka tarsadiya university for molding me for years to reach at this level. My continuous interactions with faculties help me to think independently and enlarge my view of professional career. I would say that this college and University has polished me in so many ways throughout the 2 years of course.

The infrastructure of our college is wonderful. All the classrooms and labs are fully equipped with latest instruments which are helpful for the students to better understand the theoretical description of any topic in practical way. The best thing in our college is its culture. All faculty members are very kind in nature and very much helpful to the students. One more thing that I liked most is Morning Prayer. It maintained positive energy throughout the whole day. Every year our college celebrate sports week with games like cricket, table tennis, badminton, Chess event etc. There were industrial visits in different companies like Atul industry, Arti industry limited.

I want to thank my college which gave me lot of learnings which I cannot express but this college played a very important role in development of my career as well as my personality.
