

**“Uka Tarsadia University: Imparting knowledge, Awakening wisdom, Transforming lives”**

Department of Chemistry, Uka Tarsadia University has indeed played a vital role in my life and career. As said – Education is a key to success. Journey of Five years at this institute was incredible. Joining this institute as an empty pot and slowly started getting filled with knowledge, hopes, confidence, dreams and many more. Which has given me a platform where I have grown not only in my subject but also have raised and transformed from zero to valued person. It is proved that university has aforementioned three qualities.

And for this, all credits goes to the Faculties. They have always been supportive, motivative and helpful. They have always nurtured us to grow more and more. Not only subjective learning but even they have taught us the moral values of life.

Besides these all positive qualities and continuous rapid growth, there are few suggestions for further betterment of our department... Now we are having a world class library, so we can have more number of books and other e-resources to meet the requirement. We should also look after our admission process, it should be on merit base with specified number of seats, and if possible we can conduct a written test at least for admission in PG.

**“Hard work + Confidence + Patience = Success”**

**Harshil S. Bhatt**

**B.Sc. (Chemistry; 2014-2017)**

**M.Sc. (Organic Chemistry; 2017-2019)**
