

My views about UTU-CHEM

My journey at Uka Tarsadia University was full of incredible experiences. I have completed my MSc in Organic Chemistry with the achievements of Gold Medal during 2017-2019. Department of Chemistry has everything - Supportive faculty, Quality education and Beautiful green campus.

While studying here, the faculties have offered a lot of knowledge, inspiration and guidance. I learned many things far beyond bookish knowledge and even got opportunity for an Internship at IITGN which helped me to broaden my understanding. I have enjoyed a lot taking part in various activities being conducted like annual events and Uth Fest, which also helped me to develop my distinctive character. I am thankful to every faculty member who pushed me to be a good student. The growth I have seen in myself due to UTU is invaluable.

I left Department of Chemistry, UTU with diverse change in personality and such intangible assets which are now part of my life. I am happy to call myself an Alumnus of this department. I really cherish the memories of my days at Department of Chemistry, UTU.
