**WORKSHOP CONTENT:**

Shrimad Rajchandra College of Physiotherapy organized a two-day expert session on radiological investigations for third-year BPT students. The session covered how to interpret bone x-rays and how to spot fractures in different bones of the body. Additionally, there was also an explanation of brain MRI and CT images. It began with information on the history of CT and MRI scans, then covered different types of scans and what to look for in CT and MRI film. There was also a description of the reports and how to interpret the scans. Students who attend this session will be better able to comprehend the diagnosis and treat patients as needed.
